

STANISLAV MAMULIN

FULL STACK DEVELOPER

ABOUT ME

Full stack developer with experience 2+ years in creating single-page applications using React, Redux, JavaScript, TypeScript, HTML, CSS and backend knowledge in Node.js, Express, NestJS. With 11+ years of commercial experience in IT, I have been particularly focusing on software development for the past two years. My brain enjoys programming work. I'm eager to acquire new knowledge while respecting established ideas.

EXPERIENCE

SENIOR TECHNICAL SUPPORT ENGINEER

S7 IT

APRIL 2019—OCTOBER 2022

IT department of S7 Airlines with 10000+ employees

- Lead Software Engineer for air ticketing system: interaction with the business customer, communication with software development company, end users technical support, maintenance servers with the system.

EDUCATION

NOVOSIBIRSK STATE TECHNICAL UNIVERSITY

Novosibirsk, Russia

Bachelor's degree of IT

ADDITIONAL EDUCATION

THE ROLLING SCOPES

SCHOOL, SEPTEMBER 2022 — JUNE 2023

Frontend and Backend courses in a school focused on self-learning. Only ToRs were given, the search for a solution was independent with final mentor verification.

Achievements: was in the 30% of people who got certified.

SKILLS

- React · React Native
- Redux · Redux Toolkit/Query
- Adaptive web design
- WebPack
- JavaScript (ES5/ES6+) ·

TypeScript

- HTML · CSS · SASS
- REST API · GraphQL
- Node.JS · Express · NestJS
- Firebase (Firestore, Auth)
- MySQL · PostgreSQL ·

MongoDB

- Jest · Vitest
- Object Oriented Programming
- Functional Programming

LANGUAGES

English: Pre-intermediate (A2+)

Russian: Native

KEY PROJECTS

TRELLO CLONE I FEBRUARY 2023

<https://github.com/StaniMamulin/rsclone-trello>

Clone of web-based, Kanban-style, list-making application - Trello.

Full-stack team project of 4 people: 3 developers with final and milestone reviews by a mentor.

Features: Multi-user application — Adaptive web design (AWD) — Validation of form fields — Keyboard control, hotkeys — Switching between two languages — Modal windows — Routing (without reloading the application page) — Displaying 404 error page

Achievements

- Learned Angular framework new for myself (and the whole team) and implemented a ready project on it in 1 month.
- Implemented a Node.js backend using JWT authentication next to the main frontend part.

Technologies and tools

Front-end: Angular, RxJS, Angular Material.

Backend: Node.js, Connect, in-memory DB, CRUD, JWT, CORS.

Common: TypeScript, Git, Gitflow Workflow, Trello, REST API.

HOME LIBRARY SERVICE (BACKEND) I JUNE 2023

<https://github.com/StaniMamulin/nodejs2023uz-service>

REST API server for home music library

Features: Users can create, read, update, delete data about Artists, Tracks and Albums, add them to Favorites in their own Home Library — Using PostgreSQL as a database for store the library records — Authentication and Authorization with JWT.

Technologies and tools

Node.js, NestJS, PostgreSQL, Prisma ORM, Docker, REST API, CRUD, JWT, TypeScript.

GRAPHIQL I MAY 2023

<https://github.com/StaniMamulin/graphiql-app>

GraphiQL is a playground/IDE for GraphQL requests. Contain 3 pages: Welcome, User auth, GraphiQL editors.

Team project of 4 people: 3 developers with final review by a mentor.

Features: Allows you to send requests to any GraphQL server (by default Rick and Morty API) — Authorization and authentication by Firebase — Localization into 2 languages.

Technologies and tools

Common: GraphQL, Git, Gitflow Workflow, GitHub Projects.

Front-end: TypeScript, React 18 + suspense feature, Redux, Redux Toolkit Query, Vite, React hook form, Firebase Authentication, Private routes, 404 error page, Error boundary, i18next, Semantic layout.

ONLINE-STORE I DECEMBER 2022 - JANUARY 2023

<https://github.com/StaniMamulin/online-store-team>

Front-end part of the online store.

Team project of 3 people: 2 developers with reviews by a mentor.

Features: Product page with filters — Cart page of selected items — Modal window of registration (purchase) of selected goods — Product description page — Header containing the number of items added to the cart and the total amount of purchases — Page 404

Technologies and tools

Common: Git, GitHub.

Front-end: TypeScript, webpack, SCSS, HTML.
